

Supplementary Fig. 3. Forest plot for the area under the curve (AUC) and 95% confidence intervals (CIs) of standard fracture risk assessment tool (FRAX) with bone mineral density in discriminating subjects with and without hip or major osteoporotic fractures for studies with more than 10% fracture events. MOF, major osteoporotic fracture; GCs, glucocorticoids; OVF, osteoporotic vertebral fracture; SSc, systemic sclerosis; RA, rheumatoid arthritis; HF, hip fracture.
